5 victims 700 feet from shore and the ice is thin- Is your team ready?

For Fire, Law Enforcement, EMS, and Hospital Emergency Department Staff.

- ◆ Awareness, Operation, and Technician jobs
- ◆ The critical ten duties for the first person on the scene
- ◆ What Equipment works and what doesn't - why expensive is not always better
- ◆ Minimum Necessary Equipment & Personnel
- ◆ Drowning and immersion hypothermia physiology and pre-hospital care
- ◆ What you can do from shore before the technician team arrives
- ◆ Why rescuers die and make sure it never happens to you
- ◆ Establishing **independent**-Victim- Positive-Buoyancy Victim extrication and transport procedures
- ◆ Scene management and the IMS
- ◆ What to do if the victim submerges and the dive team is not there .
- ◆ In-water Self-Rescue Skills
- ◆ Rapid Planning & Staging
- ◆ Rapid Deployment
- ◆ Working with a dive team
- ◆ Pet Rescue
- ◆ What to do when you have more than one victim in possibly more than one hole,
- ◆ What to do when victims are more than 300 feet from shore and an air boat is not available,
- ◆ What to do when the ice is too weak to hold an ice screw
- ◆ What to do when there are a minimal number of trained rescue personnel available.

Why take a Lifeguard Systems Training Program?

REAL LIFE TRAINING FOR REAL LIFE RESCUE & RECOVERY
THE SAFEST PROCEDURES IN THE INDUSTRY - GUARANTEED!

Leaders in the Water Rescue & Recovery Industry, Lifeguard Systems Instructors have been training fire, police, EMS, military, and USCG teams for over 30 years in over 15 countries.

They teach over 25 different programs with the highest training and procedure standards in the Industry. The mission: There's only one job you must do every time - go home.

All Lifeguard Systems courses provide realistic, dynamic hands-on training. No standing around watching demonstrations. They bring at least two instructors, plenty of gear, and a wealth of knowledge.

Is Your Team fully Ready to Perform Safe, Rapid **Multi-Victim** Surface Ice Rescues **BOTH** Close to Shore **AND** Over **Long Distances**?

Surface Ice Rescue incidents often involve two or more victims. They can also occur a great distance from shore. One mistake can lead to multiple Rescuer fatalities in a matter of seconds.

Can your team confidently :

- ◆ Safely & rapidly rescue multiple victims?
- ◆ Properly change rescuers without losing ground?
- ◆ Immediately establish **independent**-victim-positive-buoyancy to prevent a subsurface rescue?
- ◆ Write Standard Operating Procedures to keep members and department safe and protected from liability?
- ◆ Properly handle patients to prevent further injury & increase survival chances?
- ◆ Prevent costly equipment purchasing mistakes?

If your location has the potential for ice this course is a must!

- ◆ **Leapfrogging**
- ◆ **Rapid Round Robin Rigging**
- ◆ **Human Ice Screw Technique**

Learn to perform safe & effective rescues from time of call until patient arrives at the hospital.
